## HYDRATING RECOVERY MASK

### Professional Treatment Protocol

#### WHAT IS HYDROMERSE HYDRATING RECOVERY MASK?

Hydromerse Hydrating Recovery Mask is a simple two-step sheet-free mask and skin treatment. With unique barrier technology for targeted hydration, its concentrated formulation penetrates deeply into your skin ensuring long-lasting hydration for even the most sensitive skin types. With ease and flexibility to target specific areas of concern by making your own hydration patches e.g.: under-eye, T-zone, neck, decolletage, forehead, your whole face, or anywhere on the skin's surface.

#### WHAT WILL HYDROMERSE HYDRATING RECOVERY MASK DO?

- Calms the appearance of redness and irritation
- Repairs and restores the skin
- Reduces the appearance of fine lines and wrinkles
- Evens-out skin tone
- Aids razor burned skin
- Prevents and protects against the drying effects of the sun
- Promotes elasticity and suppleness
- Works in conjunction with LED light therapy
- Soothes and hydrates the skin after tanning
- Relieves chapped skin from abuse of the elements
- Hydrates and cools your skin
- Reduces the appearance of dark circles around the eyes

RRP: AUD \$89.99.

#### WHO SHOULD USE IT?

Clients concerned with **ageing, fine lines, redness, wrinkles, and sagging skin** or those feeling like their skin is a little **dehydrated, dull, and lacklustre**. Clients undergoing other non-ablative cosmetic skin treatments who wish to have their skin **hydrated & cooled after treatment**.

Maximise your services by preparing and hydrating the skin using Hydromerse Hydrating Recovery Mask before procedures, and after, to aid in restoring and repairing the skin post treatment. Hydromerse Hydrating Recovery Mask is developed for use in-clinic and a take home product, offering flexibility for the clinician and client. Plus additional revenue for the clinic.

75ml of Hydromerse Hydrogel enables the clinician to apply one mask in clinic with the rest to be used at home should you wish. There is enough Hydromerse for approximately **8+ full face treatments, or up to 40 under eye treatments of combination thereof**.

Clients will enjoy visibly hydrated, cooled, and plumped skin with reduced appearance of fine lines, wrinkles pigmentation, redness, and uneven skin-tone. Hydromerse also cools and refreshes the skin, making it ideally suited for use before during & after most aesthetic skin procedures. Perfect for fully hydrating the skin before make-up application.

#### Ingredients:

Hydromerse Hydrating Recovery Mask Gel Stage One: Aqua, Propanediol, Glycerin, Sodium Hyaluronate, Algin, Phenoxyethanol, Menthyl Lactate, Polyacrylate Crosspolymer-6, Ethylhexylglycerin, t-Butyl Alcohol

Hydromerse Hydrating Recovery Mask Stage Two: Calcium Lactate Anhydrous.

Benefit	Supporting Ingredients
Cooling	Menthyl Lactate
Soothing	Glycerin
Hydrate	Hyaluronic Acid, Glycerin & Aqua

## **HOW TO USE HYDROMERSE HYDRATING RECOVERY MASK:**

**(TIP – try using on the back of your hand first to get a feel for the product usage)**

**OPTION ONE:** If your client is to leave the clinic with a hydrating mask on, or is using the mask at home, or you wish to set the mask in place whilst undergoing other skin treatments such as LED light mask therapy. Setting the mask with the spray is ideal where longer hydration is desired.

Step 1: Ensure skin is clean and dry

Step 2: Remove Atomiser Spray attachment (Labelled Stage 2) and add 50ml of tepid water to bottle (that's about ½ way). Replace Atomiser Spray attachment and shake until contents are fully dissolved.

Step 3: Apply Hydromerse Gel (Labelled Stage 1) onto the area you wish to treat using a silicone applicator, approximately 1mm thick using as few strokes as possible. Do not rub in.

Step 4: Spray Atomiser (Stage 2) liberally over the treated area. Ensure all areas are sprayed. Approximately 12 Sprays per full face treatment.

Step 5: Allow at least 10 seconds for the spray to work. Check to see a barrier has formed on the outer layer, the gel should not feel sticky or tacky. Respray liberally if required.

Step 6: Leave mask on for as long as required, we recommend at least 10 minutes. During this time continue any other procedures you wish to undertake, head massage, LED light therapy etc.

Step 7: Either wash off the mask with warm water or advise your client they can go home and simply wash the mask off themselves. Hydromerse can stay on as long as the client wishes it to. It will not slip nor slide off and continues to hydrate, cool, and soothe the treated area.

**OPTION TWO:** If your client is to have a hydration mask on during their treatment but you wish to use other products immediately afterwards.

Step 1: Ensure skin is clean and dry

Step 2: Apply Hydromerse Gel (Labelled Stage 1) onto the area you wish to treat using a silicone applicator, approximately 1mm thick using as few strokes as possible. Do not rub in.

Step 3: Allow at least 5-10 minutes for the Hydromerse to work. During this time continue any other procedures you wish to undertake, head massage, LED light therapy etc.

Step 4: Wash or wipe off the Hydromerse Hydrogel with clean water.

Step 5: Continue with other skin treatments/products as required.

## **PRECAUTIONS**

- Not for injection - for external use only - If contact with eyes occurs, rinse with water.
- Do not eat- If ingested seek medical guidance.
- If a reaction occurs remove with water- if symptoms persist seek medical guidance.
- Do not use if you have known allergies to any ingredients.
- Do not perform any skin penetration procedures at the site where Hydromerse is applied.

## **SUGGESTED UPSSELL FOR TAKE HOME RETAIL**

Hydromerse Hydrating Recovery Mask harnesses a unique formulation that will cool, soothe, hydrate, and refresh the skin. It visibly reduces the appearance of fine lines, wrinkles, redness, pigmentation, uneven skin tone & sagging skin and is the perfect take home treatment product for a quick yet clinical skin hydration boost to the face, décolletage or other body areas in between clinic visits.

The novel two-step application means your clients can wear a mask whilst undergoing other activities as it won't slip nor slide off. Ideal for those who are time limited and want to multitask at home.

Hydromerse Hydrating Recovery Mask can be used at alternate sites during other skin treatments,
